

OABA's training is interactive, encouraging information sharing and provides for knowledge transfer, skills and competencies through flexible learning format with a focused approach to the industry's issues and needs. With the ultimate result leading to informed staff members of workplace health & safety challenges, and facilitating solutions leading to a safer work environment. OABA has embarked on an approach to publish our public offering training schedule for the year commencing October 2016 to September 2017 providing the members with better planning for staff health & safety education and training.

Check out the following testimonial!

*Fred shows full understanding with the Act & Regulations, providing us with excellent knowledge in an easily learned format.
Greg Quick, Great Lakes Agra Corporation, London*

*Really enjoyed the training, Fred made me feel very comfortable throughout the process.
Christine Schoonderwoerd, Wallenstein Feed & Supply, Wallenstein*

Register early, space is limited!

For further details on session content, please refer to the attached workshop information sheets. We also welcome any organization preferring an in-house workshop to contact Fred Spiro directly to arrange a suitable date and time. For any additional information, please feel free to contact Fred Spiro directly at 519-822-3004, or by e-mail compliance@oaba.on.ca.

2016-2017 OABA Regional Health & Safety Workshops

Canada Labour Code (CLC) Part II

This is an introduction to Federal health & safety legislation for workplaces under the CLC, it provides knowledge and understanding of obligations and responsibilities by employer's, supervisors and workers.

Participants will become familiar with and focus on the following;

- How to find and reference information in the CLC part II
- General duties and responsibilities of the workplace parties as outlined in legislation
- Hazard recognition and workplace inspection
- Injury prevention
- How to avoid sprains and strains- ergonomic awareness
- Due diligence and Bill C-45

**Please note the legislation your workplace falls under and select the applicable session*

Confined Space Safety Training

Utilizing MoL O.Reg 632/05 and Canada Labour Code and Regulations for confined space. This program will address the following;

- Review of legislative requirements
- Recognition of hazards associated with confined space entry
- Testing, safe entry procedures and permits
- Supervisor responsibility, employee training
- Confined space rescue.

**Please note that the OABA Working at Heights safety training is a prerequisite for a certificate*

Due Diligence Safety Training

Participants will become familiar with;

- Review injury/Illness statistics published by WSIB
- Identify legal requirements for employer, supervisor and worker
- Focus on supervisor's role in dealing with: accident investigation, workplace inspection, staff training, unsafe work refusal and communication
- Recognize the true meaning of "Due Diligence" leading to protecting the worker, employer and themselves

Lockout/Tagout Safety Training

In accordance with the Occupational Health and Safety Act (OHSA), Ontario Regulation 851 and the Canada Labour Code – Part II (CLC), there are requirements for equipment and machinery to be locked out of service when work, maintenance or adjustments are being done. This workshop will address the following;

- Legislative requirements under OHSA/CLC, and CSA Z460-05 standard "Control of Hazardous Energy"
- Hazardous energy control program and how to apply in your workplace
- Which energy source require lockout and why
- Step by step procedure for equipment lockout/tagout
- Supervisor responsibility, employee training (authorized VS affected)
- Periodic inspection and system evaluation

Machine Guarding Safety Training

Based on the Occupational Health and Safety Act (OHSA) Ontario Reg. 851 and the Canada Labour Code (CLC). Participants will become familiar with and focus on the following;

- Provincial/Federal legislative requirements, and CSA Z432-04 standard for “*Safeguarding of Machinery*”
- Identify key hazards associated with equipment
- Principles of machine safety
- Appropriate selection and application of guards and safety devices
- Employee training, maintenance, inspection and use of PPE
- Equipment related emergency planning

Occupational Health & Safety Act & Regulations (OHSA)

This is an introduction to provincial health & safety legislation in Ontario, it is meant to assist employers, supervisors and workers to understand their responsibilities and comply with legislative requirements.

Participants will become familiar with and focus on the following;

- How to find and reference information in the OHSA
- Duties and responsibilities of employer, supervisor and worker
- The internal responsibility system and due diligence
- Function and powers of joint health & safety committees and health & safety representatives
- Reprisals, notices and enforcement
- Regulation 851 for Industrial Establishment

Supervisor Awareness

This is Supervisor health & safety training for Ontario Regulated workplaces. The training is made available by the Ontario Ministry of Labour with the focus on general awareness of rights and responsibilities under the Law. Above and beyond what is covered in this training, employer has a duty under the OHSA to ensure Supervisor competency. That’s why we have allocated the afternoon to address the understanding of the OHSA and Due Diligence to support supervisor competency as defined by the OHSA.

Working At Heights Safety Training

This workshop will focus on the basics of fall prevention while working at heights. Participants will be able to recognize fall hazards and apply appropriate controls. Topics will include;

- Review of applicable legislative requirements (Federal & Provincial)
- Working with ladders, elevated platforms, guardrails, bins/silos
- Various methods of fall protection
- Types of fall arrests systems including safety belts, lifelines/lanyards and anchorage points
- Equipment inspection, and safe application (use)

“bring your fall arrest system to the session for hands-on practical usage”
